9/12/68

Dear Paul,

Our financial condition has so deteriorated that I am measuring postage. I weigh each letter so that I can include the maximum amount without it costing another dime. Today, in haste, I think I included the carbon of the letter I wrote you about Penabez.

I also forgot to tell you that I have the microfilm and am mailing it without opening it.

Please return the carbon if I did include it.

John did not keep his word, as you will see. It again causes misgivings.

If for any reason I did not make a copy of the Penabez file for Hal, let me know and I'll send one to you. Have you anything else on him? Duarte? RECE?

Does one of you have the Garson paper he refers to?

I'd like the original of this issue of "Insight" if one of you gets it, for I can then use the picture. I know that if I write Penabez I'll get nothing.

Sincerely,
